Steel Door

PANEL STYLES

Enhance your curb appeal and add value to your home with a steel entrance door, which come in a range of panel designs to complement any home style. The durable strength provides maximum strength and security.

SMOOTH STEEL

A touch of elegance without sacrificing energy efficiency

- Available in 22-gauge inner and outer steel face sheets that is designed and engineered to give you years of trouble-free service
- Energy-efficient – the solid polyurethane foam core protects your home against heat and cold
- Steel-edged slab will not split, crack or warp
- Adjustable hinge plate allows for easy adjustment and alignment

TEXTURED STEEL

The look of wood with the strength of steel

- Deep Oak woodgrain embossment give a realistic wood appearance
- Available in 22-gauge inner and outer steel face sheets that is designed and engineered to give you years of trouble-free service
- Energy-efficient – the solid polyurethane foam core protects your home against heat and cold
- Steel-edged slab will not split, crack or warp
- Adjustable hinge plate allows for easy adjustment and alignment

• 2264 LRL Door with SL864 LRL Sidelights

684 TPZ Door

Fiberglass Door

PANEL STYLES

Engineered for durability and longevity, fiberglass entrance doors are the perfect complement to your home. They add depth and dimension, while being low-maintenance and energy-efficient.

SMOOTH FIBERGLASS

Contemporary in style — sleek, clean & paintable

- Engineered not to dent, rust, warp or delaminate
- Remains unmarred by wear and tear of everyday use
- Fiberglass reinforced skins, full-length composite stiles and rails with HydroShield provide 6-sided protection against water filtration
- Advanced polyurethane foam core provides superior thermal performance and enhances soundproofing

TEXTURED FIBERGLASS

Stainable rich woodgrain embossment replicates the look & texture of real wood

- Realistic graining available in oak appearance
- Not affected by moisture and humidity
- Engineered not to dent, rust, warp or delaminate
- Architecturally-correct stiles and rails
- Remains unmarred by wear and tear of everyday use
- Fiberglass reinforced skins, full-length composite stiles and rails with HydroShield provide 6-sided protection against water infiltration
- Advanced polyurethane foam core provides superior thermal performance and enhances soundproofing

TIMBERGRAIN FIBERGLASS

Stronger dimensions & crisper shadow lines

- 4-1/8" stiles consisting of 3-1/2" Laminated Strand Lumber and 5/8" hardwood capped edges, 1" composite rails
- Fiberglass reinforced door skin will not splinter, warp or rot
- Architecturally-correct stiles and rails
- Square edge design give true wood door appearance
- Many decorative glass options available, as well as simulated divided lites
- Adjustable hinge plate allows for easy adjustment and alignment
- Advanced polyurethane foam core provides superior thermal performance and enhances soundproofing
- Available in four beautiful collections:

Oak Grain

Cherry Grain

Fir Grain

Mahogany Grain
(special order)

TC248 Door with SL690 CD Sidelites

Features & Benefits

STEEL DOORS

Enhance curb appeal and add value to your home with a steel entrance system, which come in a range of panel designs to complement any home style. The durable strength provides maximum strength and security.

STEEL-EDGE CONSTRUCTION

- Constructed of top quality, galvanized steel for rust protection and superior durability; with a full steel-edge perimeter for additional strength
- Heavy 22-gauge, hot-dipped galvanized steel is 50% thicker than a standard steel door
- Resists cracking, splitting, warping, twisting or rotting
- Grade 40 security rating – best in the industry (steel-edge doors will not force open after 7 hits of a 100 lb. test weight; wood-edge doors can crack after just one hit)

ENERGY-EFFICIENT & IMPROVED SECURITY

- Fully insulated with an inner core of environmentally friendly polyurethane foam for an R-value of 13.0, which is more than four times that of a wood door
- Foam-filled interlock provides for a thermal break
- The lock area is reinforced with a full 4" x 10" composite lock block, which has more screw-holding power than wood
- The lock block provides better structural integrity and security for door hardware

FIBERGLASS DOORS

Fiberglass entrance systems are the perfect complement to your home, they add depth and dimension, while being low maintenance and energy-efficient. They are engineered for durability and longevity, and provides maximum protection.

CONSTRUCTION

- Constructed of deep-profile fiberglass reinforced skins with stronger dimensions and crisper shadow lines, replicating the look and texture of real wood doors
- High-strength engineered composite top and bottom rails provide protection against water penetration
- Remains unmarred by wear and tear of everyday use, and all surfaces are easy to stain, paint and clean
- Engineered not to crack, splinter, rust, warp, rot or delaminate

ENERGY & THERMAL PERFORMANCE

- Advanced polyurethane foam core enhanced sound proofing and has insulation properties that are at least four times greater than wood doors
- Fully insulated to provide superior thermal performance and greater energy efficiency

TRADITIONAL GLASS FRAMES

- Traditional glass frames provide the look of fine millwork moldings framing the door lite while providing an air and water tight seal. Traditional frame are installed with flush fit screw head covers on the inside of the door to provide a finished look.

CRAFTSMAN GLASS FRAMES

- Craftsman glass frames provide a flat profile framing the door lite while providing an air and water tight seal. Craftsman glass frames are installed with flush fit screw head covers on the inside the door to provide a finished look.

DECORATIVE GLASS

- Wavy textures, lines, tiny bubbles and other natural effects all reflect light differently, creating an elegant entryway
- All glass lites are hand assembled by craftsman and will offer minor differences from piece to piece – no two pieces are identical
- Each doorglass design varies in the amount of light it transfers and privacy it affords – look for the numerical privacy level (0-10) within each collection

ADJUSTABLE HINGE PLATE SYSTEM

An original system by Taylor Entrance Systems™

- Located inside the door at each hinge, which makes it possible to adjust the door up or down, and in or out for a tight weather-seal
- It's important to adjust your door because improper alignment could cause the weatherstrip seal to break, allowing outside air to enter to heat to escape
- Adjustments with a screwdriver can be made at anytime; at installation or in the future should the climate or normal settling affect the door opening
- Standard in Smooth Steel, Textured Steel, & Timbergrain Fiberglass Doors

SMOOTHER OPERATION & SECURITY

- Decorative ball-bearing hinges to match lock hardware, as standard
- T-nuts are used on door jambs for attachment of hinge screws – this keeps screws from stripping for years of trouble-free performance
- Optional steel strike reinforcing plate attaches behind the wood strike jamb for additional security

WEATHER-TIGHT SEAL

- Easy slide-on door sweep stops air and water penetration and is not affected by temperature extremes
- Weatherstripping forms a tight weather-seal between the door, frame and threshold; preventing air infiltration
- The Ultimate Astragal eliminates water and air infiltration in double door applications
- Adjustable Riser – thresholds with a riser can be easily adjusted with a screwdriver to meet the weatherstrip on the bottom of the door to create a tight weather-seal

Frame OPTIONS

ENDURA™ FRAMESAVER® (standard)

- Designed and manufactured to withstand time and the elements with a lifetime warranty, that's transferable to subsequent homeowners
- Will not rot, decay or suffer fungal damage resulting from water absorption through the bottom of the frame
- FrameSaver frames are factory primed white
- Field Proven – over a decade of “non-rot” performance

DURA-TECH JAMB (upgrade option)

- A durable, rigid, UV-resistant PVC bonded to our lifetime Alaskan Cypress bottom Dura-Frame jamb
- Available in white vinyl (standard) or pre-finished in 24 colors
- Woodgrain vinyl available pre-finished in five artisan stain finishes

ULTIMATE ASTRAGAL

- A patented three-point sealing system eliminates water and air infiltration
- Unique floating boot lifts up with the flush bolt to clear the threshold when the door is opened and is secured in place when the door is closed to provide a lasting seal
- Easy installation, saving time and money

Z-SERIES SILLS

- The best combination of performance and value
- Technologically advanced all-composite substrates, synthetic caps and nosing mean no rotting, warping or deterioration over time
- Provides a barrier to wind and water, protecting you and your home from drafts and costly damage

STEEL REPLACEMENT FRAME

Add curb appeal and enhanced security to your home

- Aluminum door stop provides greater security and is more durable than wood
- Magnetic and Q-Ion seal for superior energy efficiency
- Knob and deadbolt prep with a 12-gauge reinforced plate for both locks and hinges
- Heavy duty 18-gauge steel frame proves the highest security rating in the industry
- Replacement doors pre-hung in a steel frame surpasses the most stringent forced entrance security tests
- Adjustable T-Strike for easy adjustment and alignment

PAINT FINISH (option)

Our entry door paint finishes are state-of-the-art coatings formulated for maximum durability and lasting beauty. We are confident that our finishes will stand the test of time and enhance any home.

STAIN FINISH (option)

Our entry door stain finishes are hand rubbed by skilled craftsmen and receive a clear topcoat for added UV protection and durability. Choose a color to complement your home's trim, floor or cabinetry.

NOTE: Custom colors are available at additional costs. Due to the effects of heat, light, age and the printing process, the sample colors shown may vary from the actual paint or stain colors. See your dealer for an actual color chart.

Hardware OPTIONS

Internal Blinds RAISE & LOWER

G1 RBL Double French Doors

Fully raise and lower blinds with a light touch. There's no dusting, no cleaning and no swinging blinds. No exposed cords that look messy and get tangled up. You will enjoy the increased energy efficiency.

Blinds built right between the clear insulated glass let you control light and privacy with the touch of a finger. Perfect for entry doors, sidelites and patio doors where decorative glass is not required.

Blinds are sealed between tempered safety glass for longer life & better insulation.

The single operator lets you raise, lower or tilt the blinds in an easy slight movement.

Available on all raise & lower including blinds with internal muntins.

⌘ = NOTE: There is a small gap between edge of internal blinds and glass trim at the left, right, and bottom to ensure proper operation with raising and lowering the blinds.

● = Textured Steel | ■ = Smooth Steel | ▲ = Smooth Fiberglass | ◆ = Textured Fiberglass | 0 = Oak Timbergrain | C = Cherry Timbergrain | F = Fir Timbergrain

Internal Muntins

Sealed between two panes of tempered glass, our contour internal muntins offer the same classic style of external muntins but are easy to clean. Contoured internal muntins are 5/8" thick within a 1" insulated glass panel, with Low E glass to maximize energy efficiency.
